Dan,

Thank you for the additional figures and update. We will review and update our plans for sample splits accordingly.

Best regards,

Terry

As promised, here are maps which show mine waste and sediment sampling locations. Additionally, we revised the associated spreadsheet with the addition of 3 sediment sampling locations – they are highlighted in yellow. Please disregard V2 of this spreadsheet.

Thanks

Hi All

Attached are maps and tables that summarize the sampling that EPA will be conducting next week. These tables and maps provide detail (and some modification) that was missing in the 2015 SAP. If you would like to view the whole SAP it can be downloaded at <https://drive.google.com/file/d/0BxEIqFmtI5iDZmhNXzJzMi1nMnc/view?usp=sharing>.

An additional map(s) that depicts mine waste and sediment sampling location as described in "Aug2015 Sediment and MineWaste LocationsV2.xlsx" will be forthcoming.

TechLaw has rented a house at 961 Bluff Street, Silverton, Colorado 81433 and we will be meeting there at 3 pm on Monday Aug 3 for a H&S briefing, sampling protocols, gear organization and logistics for the week. Please make that if you can but if not we will fill you in on Tuesday morning.

Please feel free to contact me if you have questions or concerns.

Dan
